Education

•National Institute of Technology, Rourkela *2025-2029*
B.Tech in Computer Science and Engineering (2nd Year) CGPA: 8.25

•PVSS DAV Public School, Jhumri Telaiya *2024*
Board of Intermediate Education(CBSE),Jharkhand Percentage:91.2

•Meridian Academy, Jhumri Telaiya *2022*
Board of Secondary Education(CBSE), Jharkhand Percentage: 91.4

Experience

•APS-Club
Technical Member NIT Rourkela
– Participated in competitive programming activities.
– Collaborated with peers on algorithmic problem solving.

Personal Projects

•Vibranium – AI Startup Success Predictor
Designed and developed an AI-powered platform to evaluate startup ideas using the Google Gemini API.
– Tech Stack: Python, Flask, Google Gemini API, Firebase Authentication, Firestore, HTML, CSS, JavaScript, Docker
– Implemented secure user authentication and cloud-based report storage with Firebase. Generated detailed startup analysis reports, including strengths, weaknesses, risk assessment, scoring, and execution roadmap. Deployed the application using Docker and Hugging Face Spaces.
– Live Demo: https://vibranium0-vibranium-ai-success-predictor.hf.space
– GitHub Link: https://github.com/Vibranium00/AiSuccessPredictor

•Bank Management System(P2Pay)
Built a banking application supporting account creation, deposits, withdrawals, Balance inquiry, Update and Account Close .
– Tech Stack: Python, OOP, File Handling
– Designed and implemented an object-oriented banking system using Python classes and inheritance. Developed secure account management features, including account creation, deposits, withdrawals, balance inquiry, account updates, and account closure. Implemented file handling for persistent storage of customer and transaction data. Built a menu-driven interface with input validation and exception handling to ensure reliable user interaction.
– Live Demo: https://p2pay-banking-portal.onrender.com/
– GitHub Link: https://github.com/P2THE28/P2Pay-Banking-Portal

•Student Management System
Developed a Python-based Student Management System using Object-Oriented Programming (OOP) principles.
– Tech Stack: Python, OOP, File Handling
– Implemented CRUD (Create, Read, Update, Delete) operations for efficient student record management. Utilized file handling for persistent data storage without relying on a database. Designed a menu-driven interface with input validation to ensure reliable and user-friendly interaction.
– Live Demo: https://student-management-system-abyw.onrender.com/
– GitHub Link: https://github.com/P2THE28/Student-Management-System

Technical Skills and Interests

Languages: C++, Python, HTML5, CSS3
Developer Tools: Git, GitHub, Visual Studio Code, Jupyter Notebook
Frameworks:Flask
Cloud/Databases: Firebase Authentication, Cloud Firestore, Hugging Face Spaces
Soft Skills: Problem Solving, Teamwork, Communication, Quick Learning, Analytical Thinking
Coursework: Data Structures & Algorithms, Object-Oriented Programming
Areas of Interest: Artificial Intelligence, Machine Learning, Competitive Programming, Robotics

Achievements

•Codeforces: Solved 200+ problems. *Highest Rating: 1002*
•LeetCode: Solved 60+ problems. *Highest Rating: 1440*
•CodeChef: Solved 20+ problems. *Highest Rating: 1132*
